

# GIBRALTAR EXPANSION FUFILLS GROWING OUTSOURCING NEEDS

*Gibraltar Laboratories, Inc* is adding an additional 16,000 square feet of FDA CGMP, ISO compliant space in a newly-acquired facility in Fairfield. Together with the current 10,000 lab-office complex the acquisition will assure the Company's ability to provide test services to its ever-expanding client base in the areas of MICROBIOLOGY and ANALYTICAL CHEMISTRY for the pharmaceutical,

device, biotech, tissue, specialty and cosmetic and industries. The new facility will have a large dedicated stability chamber room, a large class 100 sterility test suite with class 1,000 staging, and gowning areas with a walk-in incubator. The laboratory will also contain a large BSL-3 laboratory for research and claims substantiation in microbial control and decontamination including bacteria, molds and viruses. The general Microbiology Section will continue to provide harmonized USP-ISO-OECD assays plus the testing methods as set forth in CTFA, AOAC and ASTM, etc.

The current facility will be redesigned to offer a more comprehensive array of Method transfer/Validation, Stability Analytical Chemistry services including Raw Material Certifications and Active Ingredients in all dosage forms. Atomic Absorption is being added as is a separate suite to support the Company's well known position in Environmental Monitoring.
